

### NEW MEANS FOR SAVING GOLD IS DISCOVERED

Inventor Now Ready to Demonstrate the Value of His Method.

One of the latest mining companies to enter the Southern Oregon field, is one recently incorporated under the name of the World Mining Milling Company, of which W. L. Long is president, W. H. Faubion, vice-president. It is the intention of the company to shortly install a plant by which the values from both free-milling and base ores may be extracted by a chemical process after the ore has been reduced to the proper fineness. It is understood the plant will be installed in the Oscar Creek district, where the company now owns several very promising claims. The company has already located a tunnel site on section 14 which will penetrate one of the richest mountains in that famous district, which is only about 10 miles from the city of Grant Pass.

It is claimed for the Long extraction system that from four to 10 times the values can be gotten from any ore, than can be secured by any other known process. While this may seem incredible to many, yet from a description of the workings of the system, and the still more convincing argument—the fact that many tests have been recently made on the ores of Josephine county wherein the actual gold was recovered by this process, it leaves but little doubt that Josephine county will shortly witness within its boundaries, an improvement in the extraction of ore values which will add millions of dollars to the resources of the county.

In speaking of the Southern Oregon ores, and of the process itself, Mr. Long, inventor and discoverer of the process, says: "The people of Southern Oregon little realize the countless millions of dollars worth of mineral there is lying beneath our feet. It will be but a very few years until this blind indifference existing in this country will be a thing of the past, and the boom which Goldfield, Nevada, has been enjoying, will be but a drop in the bucket, as compared with the boom which this country will see. I have never been in a country where the people as a rule seem to be enjoying such a deep slumber as they are

in this country. Legitimate mining should be advocated and upheld financially by the business men of this county, and especially Grants Pass, instead of letting foreign capital invade our district and carry off the dividends which should stay at home and enrich the people of this community.

"The people of this country are too easily satisfied. Rather than raise a few dollars at home to put a desirable 'prospect' on a producing and paying basis, they will let eastern capital secure the plum and they will be content with a measly small profit on some of the supplies that are sold the enterprise, while the perpetual profits in the way of dividends to the tune of many thousands if not hundreds of thousands of dollars, find their way to the pockets of the eastern capitalist who had the nerve and backbone to back their convictions with cash. This state of conditions is not always going to exist. All the people are not going to be fooled all the time, and the time will come when this intense slumber will begin to lose its grip on the people, and when it does, look out for a reversal of the present conditions, and a wild scramble among our present ultra-conservative.

"Regarding the Long extraction process. To go into the details would require more time and space than you would be willing to permit, besides the process itself—that is, the chemicals, and their use—is a secret known only to myself, and has been perfected after a 20-year course of study and experiments. My success in this connection is due entirely to the fact that I have made a careful study of the mineralogical and geological laws of nature, and that I have worked in unison with these laws instead of with the laws and hobbies of whimsical men. Many of the different classes of ores in this county possess certain ingredients which, under the ordinary method of extraction will carry off the values, while under my chemical extraction, these ingredients are overcome by the effects of certain chemicals introduced for that purpose, and the values are freed from the bases, and extraction made perfect. There are also certain chemicals introduced in the process, to hasten the formation of gold and other minerals that are but partially formed by nature, and which would be lost under the ordinary method of extraction. These are only a few of the reasons whereby I am capable of ob-

taining so much better results with my method of extraction.

"It is our intention to install a 10-ton plant as a starter and increase the capacity of the plant to accommodate the output of the mine, and the custom work which is bound to come to such a plant. We are in hopes to have our plant in operation in 90 days."

### KERBY

Mr. Hansen is in from his mine. Henry Whitrock is in town again.

Mr. Wells and family were in town Sunday.

Mr. Trenholm is visiting Mrs. Fleming.

Mr. Ayers has gone mining for a few days.

Mr. Wilson is looking after business interests here.

Mrs. Howland of Portland is visiting Mrs. Carter.

Miss Grace Oswald is visiting friends in Kerby.

Miss Stella Hart is visiting her aunt, Mrs. Thompson.

Mr. Fred Hart and Miss Oswald visited school Monday.

Mrs. McCallister is now convalescing from her recent illness.

Sheriff and Mrs. Lewis stopped at "The Pioneer" Monday night.

Mrs. Stiwalt and her sister, Miss O'Brien, were in town Tuesday.

Misses Daisy and Florence Thompson were in Grants Pass Monday.

A crowd from Kerby attended a dance at Mr. Houck's Saturday evening.

Prof. Nickerson is in town. He is wearing a new coat of the latest English cut.

Messrs. Howard, Ayers, Seyferth and Woodcock have returned from Grants Pass, where they have been attending court.

Roll of Honor for January of the Kerby school:

Teracy Stith, Elsie Stith, Wesley Woodcock, Ralph Feheley, Harry Floyd, Fred Meissner, Bertha McCallister. Total number enrolled 23. Louise F. Guthrie, Grammar dep't.

Dama Duncan, Effie Brown, Mamie Turner, Erma McCallister, Elsie Turner, Rilda Stith, Martin Maurer, Katharina Maurer. Total number enrolled, 22. Lerona McFarland, Primary dep't.

### Prefers Dairying to Hop Raising.

Hope at 9 cents a pound and hay at \$10 a ton are having a stimulating effect on the dairy industry in Josephine county, and many farmers are turning their attention to keeping cows and selling milk, cream and butter, at a price for which is not possible to be gambled with like hops or ruined by over-production like hay.

F. A. Clements is a farmer who is taking up the dairy business in a practical way that indicates that he will make a success of it. He bought last year a 160 acre farm three miles southeast of Grants Pass and last Fall he moved with his family to his new home from Placer. He bought a number of cows and last week he bought of the Rogue River Creamery at Medford a separator and will now begin to ship cream to that creamery, as there is no creamery in Grants Pass. There are a number of farmers in the vicinity of Grants Pass in the dairy business and others are planning to engage in it, so there is a certainty that the importation of milk and cream will no longer continue and that a creamery will be built here at no distant date.

### Palace Barber Shop

BATES & WILLIAMS, Proprs. Shaving, Hair Cutting Baths, Etc.

Everything neat and clean and a work First-Class.

# FIRST ANNUAL CLEARANCE SALE

## GRAND SHOE VALUES

American made Footwear of the Best Style and Quality at Saving Prices. Every pair of Shoes in the house reduced **10 PER CENT** for the next 25 days, commencing February 3rd, with the exception of rubbers and Strong and Garfield Company's goods. Our Spring Goods will soon be arriving and we have to make room for them. Remember this discount applies to every pair of Shoes in the house with the exception noted.

### A Few of the Bargains Offered, Others too Numerous to Mention:

WOMEN'S FELT SLIPPERS, fur trimmed "Juliette" styles, 2½ to 7, \$1.50 values, the pair.....	\$1.35
WOMEN'S \$3.50 SHOES, pair.....	\$3.15
" 3.00 " ".....	2.70
" 2.50 " ".....	2.25
" 2.00 " ".....	1.80
" 1.50 " ".....	1.35
" 1.00 " ".....	.90

MISSES' and CHILDREN'S SLIPPERS, fur trimmed "Juliette" styles, sizes 7½ to 2, 90c and \$1 values, the pair.....	80 & 90c
MEN'S \$6.00 SHOES, pair.....	\$5.40
" 5.00 " ".....	4.50
" 4.00 " ".....	3.60
" 3.50 " ".....	3.15
BOYS' 1.75 " ".....	1.60
YOUTHS' \$1.50 " ".....	1.35

REMEMBER this Stock is All New; no old goods to work off, the New Up-to-Date kind; every pair goes at the reduction above noted of 10 per cent. This sale closes February 28th. Now is the time to take advantage of same.
